• Installation Instructions

This handle is designed for door thickness between 38mm to 56mm. Check that your door fulfils this requirement before you start installation.

- * Check if there are 38mm Back-to-Back screw holes in the lock body, otherwise please replace the lock body.
- * Please install the handle as the diagram below. Make sure the handle with fingerprint is installed on the outside of the door.
- * Carry out the assembly with the door open.

• Batteries & Battery Warnings

- * Put in the batteries according to "+" "-" sign on the lid.
- * When the low battery indicator lights, please replace the battery to avoid battery leakage and damage or unable to unlock the product.
After warning signal appears, theoretically the door can still be unlocked for about 50 times.
- * Dispose the used batteries appropriately. Do not bury or burn the batteries and keep away from children. Do not recharge or disassemble the batteries.

• Functionality

Wake Up Password Keyboard

Swipe the panel to the right or left continuously to wake up the keyboard.

Products Status Description

No.	LED & Buzzer Indicator	Products Status
1	Green LED on the fingerprint keeps steady for 2 seconds and buzzer beeps once	Fingerprint inputting correct
2	Red LED on the fingerprint lights and buzzer beeps twice	Fingerprint inputting wrong
3	LED on button 4 flashes twice and buzzer beeps three times	The touch handle disabled for 3 minutes
4	Red LED flashes on Low-battery indicator	Low battery

Security

If an incorrect code is entered for five times consecutively, the Touch Handle will be disabled for 3 minutes and can not be opened during this period. The purpose is to prevent unauthorized people from opening the handle. Button 4 LED flashes twice and buzzer beeps three times during this period.
